nikita.kanarev.dev@outlook.com

Product Designer with 3+ years of experience designing complex B2B products and workflows. Spent nearly three years as the sole designer in a 6-10 person cross-functional team, owning three products end to end and shipping a full partner-portal redesign. Brings technical implementation fluency to complex, legacy-heavy domains, carrying design decisions through to semantic tokens, React components and a deployed working build rather than a handoff file.

EXPERIENCE

Product Designer at DSSL

Sep 2023 to Mar 2026 / Remote

Video-surveillance developer and distributor with 19 offices and 20+ warehouses; partner presence across Russia, the CIS, Europe and Asia.

- Sole designer for all three products, working directly with frontend, backend, product management, QA and the team lead through research, information architecture, prototyping, engineering handoff and UI QA.
- Redesigned and shipped the B2B partner portal across specification upload, contract pricing, inventory and ordering workflows on top of a legacy backend.
- Designed learner and authoring workflows for an internal video-learning platform spanning courses, lessons, progress, tests, certificates, content upload and responsive use.
- Launched corporate-site sections and product landing pages, then carried shared patterns through engineering handoff and UI QA.

Product Designer - client work / Independent

Jan 2023 to Present / Remote

Paid client engagements: full-time before DSSL, alongside it from Sep 2023. Most recent contract closed in spring 2026.

- Scoped 35 Agent Ops artboards across three roles and delivered the tested clickable core within one month; the NDA client accepted the prototype after user testing and rework.
- Designed a veterinary clinic operations system from domain research with a practising veterinarian through to a working prototype.

Selected independent projects / Self-directed

Remote

Product design, design systems and interactive prototypes for my own projects.

- Pawly - a dog-care marketplace: service model, interactive prototype verified through synthetic QA, and a 33-component design system.
- Rebuilt the DSSL partner portal solution on synthetic data to publish it without disclosing client material.
- Designed and built four live Webflow demo builds end to end, including visual design, responsive implementation, interactions and QA.

SELECTED WORK

Agent Ops Console

NDA B2B SaaS / 3 roles / 1 month

Scoped 35 artboards and delivered a tested prototype that the client accepted after research-led rework.

B2B Partner Portal at DSSL

Commercial redesign / Portfolio reconstruction

The shipped B2B problem revisited as a transparent 20-screen, 45-component case study on synthetic data.

Vet Clinic OS

Veterinary SaaS / 44-screen sitemap / 2 weeks

A 13-screen prototype with 31 edge cases, grounded in research and Veterinary Doctor domain expertise.

SKILLS

PRODUCT
Product design, Information architecture, Complex workflows, B2B SaaS, Responsive design, Design systems, Component architecture, Prototyping, Handoff and QA

RESEARCH
User interviews, Workflow analysis, Competitive research, Cognitive walkthroughs, Usability testing, Agent-driven prototype QA

TOOLS
Figma, Storybook, Webflow, Git and GitHub, Claude Code

TECHNICAL
HTML and CSS, JavaScript and TypeScript (working knowledge), React, Design tokens, Component systems, Accessibility fundamentals

EDUCATION

Google UX Design Professional Certificate / Coursera — 2025

Advanced UX/UI Design / Yandex Practicum — 2024

Professional Retraining in Web and Interface Design, 530 hours / Pentaschool — 2022 - 2023

Specialist Degree in Veterinary Medicine (Veterinary Doctor) / Russian State Agrarian University-MTAA, Moscow — 2020

DETAILS

LANGUAGES: English - professional working proficiency / Russian - Native

AVAILABILITY: Open to relocation / Available for international remote work / Available immediately
